JPX-8
PROJECTOR

Look at everything. In great.

The LED video projector JPX-8 is dedicated to all the people who love the television, the cinema, the music, the sport and who want that each image is always spectacular and exciting. But, as it always is in the philosophy of Jepssen unitary technology, the most difference of JPX-8 is that it isn't just a video projector but it's a true digital multimedia system that includes the operating system Android.

Look great

The video projector JPX-8, with the high definition panel, is able of projecting panoramic images, 16:9 aspect ratio, up to 300" with bright colors (CLO 5000 lm), high contrast (140000:1/dynamic) and brightness (WLO 5000 lm), for being used in any environment and lighting. Television programs, movies, sports, photos, music, all in high definition, with bright colors (including blacks), even in bright sunlight.

Powerful and fast computer

Equipped with Quad-Core 64bit processor, powerful and fast, you can instantly perform a multitude of functions and applications and share them with all other devices on the network.

OS Android & Internet in TV

It includes the Android operating system and the main Apps and it provides to access to countless apps (every day they add new ones). Installing and launching the different apps is very simple and intuitive and surfing Internet, including the receipt of Web TV and Radio broadcasters (eg YouTube, Netflix, Dazn), is similar to what can be done from a computer, a tablet PC or a smart phone: the difference is that everything can be done comfortably from your projector!

Mail & Social

Ideal for e-mail management and accessing various social networks (eg FaceBook, X, Instagram) or instant messaging (eg Skype, WhatsApp).

Game Station 4K 3D On-Site & On-Line

It is suitable for use with the most advanced and spectacular games that require high performance and Full HD resolution, including online multiplayer ones, and it supports all dedicated USB and wireless gaming peripherals (e.g., joystick, gamepad, air).

Wireless Display, Android on TV

It embeds Miracast technology for receiving wireless (WiFi Direct) on a high-definition TV (Full HD/4K) of the contents of the screen of a remote device (screen mirroring), such as the PAN, a smartphone, a tablet, etc. The screen of the device will be projected in real time, allowing you to manage all the functions and the various applications installed.

A net for everything

The JPX-8 interacts with all related products directly through wireless with 5G WiFi 802.11ac Dual Mode 2.4/5.8Ghz and Bluetooth 4.1 modules integrated. It is compatible with all devices having the DLNA standard.

Multimedia Player

The JPX-8 integrates multiple multimedia applications as it can play videos in all popular formats, including high-definition Full HD 1080p or 4K (Mkv, H.265, H.264, MP4, TS, etc.), as well as photos, and audio, directly from external devices connected via its two USB 2.0 ports, such as hard drives, USB flash drives, cameras or digital cameras.

Long Life

Absolutely outstanding the duration of LED lamp's life, up to 50,000 hours, about 25 times greater than the life of the vast majority of expensive projectors lamps (about 2000 hours). The use of LED technology also makes the power consumption extremely low and convenient only 100W.

Easy to install

The small size and weight, the possibility to project horizontally or vertically, to fix it to the ceiling, to adjust the image using the keystone knob, focus and the electronic zoom, simplify installation. It is possible to select between the default mode or adjust all the parameters in a personalized way, and, if you do not have a 16:9 screen, you can switch the projection of images in 4:3 format.

Easy to use

The use of JPX-8 is very simple and all the adjustments and the various functions are guided by the OSD (On Screen Display). All functions can be selected using the menu buttons of the projector or by the supplied remote control.

Suit to be connected

On the back there are all necessary inputs for the simultaneous connection to the various audio/video sources, especially those in high-definition: 2xHDMI 2.0, 1xAudio and 2xUSB 2.0 ports. The projector also includes a 2x5W stereo speaker.

Extreme convenience

Considering the performance, the foreseen functions and the high technological content of the JPX-8 is absolutely the product with the best relationship price/performance actually existing in the market.

Total control

Among the wireless devices available, with range up to 10 meters 360°, you can use the Media Keyboard Pad (92 backlight soft-touch keys, game pad and mouse pad) and the Media Air Pad (air mouse, air game pad, remote control and laser pointer).

DROID LED PROJECTOR JPX-8

- Video Projector with LED 16:9 technology
- HTPS LCD 5.8" Module
- White Light Output 5000lm
- Colour Light Output 5000lm
